**DESCRIPTION (BOOK COVER EXCERPT)**

The virus kills nine out of ten of its victims so quickly and gruesomely that even biohazard experts are terrified. It is airborne, it is extremely contagious, and it is about to burn through the suburbs of a major American city. Is there any way to stop it?

In the winter of 1989, at an Army research facility outside Washington, D.C., this doomsday scenario seemed like a real possibility. A SWAT team of soldiers and

scientists wearing biohazard space suits had been organized to stop the outbreak of an exotic "hot" virus. The grim operation went on in secret for eighteen days, under dangerous conditions for which there was no precedent.

*The Hot Zone* tells this dramatic story in depth for the first time, giving an absolutely hair-raising account of the appearance of rare and lethal viruses and their "crashes" into the human race.

**REVIEWS (BOOK COVER EXCERPT)**

"The first chapter of *The Hot Zone* is one of the most horrifying things I've ever read in my whole life... and then it gets worse. That's what I keep marveling over: *It keeps getting worse*. What a remarkable piece of work. I devoured it in two or three sittings, and have a feeling the memories will linger a long time."

—Steven King

"One of the most terrifying books I've ever read. Move over Stephen King and Michael Crichton — this really happened, within sight of the Washington Monument. An sooner or later it will happen again."

—Arthur C. Clarke

Skokov is an intelligent man—that is the first thing that must be said about him. And very hard and tactful. Many people were asking what his role was in my inner circle. It was a legitimate question. Skokov was actually the "shadow" prime minister whom I had always had in mind. Both Sloyev, under whom Skokov chaired the Supreme Economic Counsel<sup>1</sup>, and Galdar, on whose watch Skokov became chairman of the Security Council, sensed a latent threat.
